A Company's Greatest Treasure - PEOPLE.

On-the-Job Training assists a company's bottom line because employees are working as they learn on-the-job, in their new work environment. That way, a company's managers can assess immediate improvements and monitor day-to-day progress. Let TBWA's On-the-Job Training help your company find, train and retain its **greatest treasure - people.**

Half the Cost. All the Rewards.

First, through the area's most comprehensive employee database, TBWA representatives help companies **find, interview and hire the most talented candidate.** Then, TBWA assists companies by **covering a percentage of the new hires' wages** while training, which is designed to improve employee productivity and help your company remain competitive.
